

nor size of Lots. I began said survey even with  
 the South side of a building supposed to be on the  
 South East corner of Lot No. one at a point 34 feet  
 and 7 inches North of the section line and 55 rods  
 and 5 links West of the South East corner of Section  
 nine. Down ten North, Range 2 West, and by giving  
 each lot a frontage of 66 feet and every two lots an  
 alley of 10 feet I found that it fit the traditions of the  
 fencing & buildings and gave general satisfaction  
 to the owners of said lots that were present, and  
 after spacing frontage to eight lots I found the center  
 of the alley between the lands of Dr. Flood and  
 Gilbert Mitchell as requested by said Trustee and  
 indicated the same by driving stakes
